ABOUT ME

Systems Analysis & Development student at IFRS – Campus Restinga (since Feb 2024). Previously completed three semesters of Civil Engineering at UFRGS, building a strong foundation in logic and analytical thinking. My interest in technology began during that degree through a VBA/Excel programming course. I have hands-on experience as a web developer with a focus on Frontend (Flask, backend integration, Git) and a growing interest in Software Quality Assurance (QA) and testing practices. I am eager to learn, collaborate, and contribute to meaningful technology projects.

PROFESSIONAL EXPERIENCE

Web Developer

Canopus

Aug 2025 – Feb 2026 · 7 months | Porto Alegre, RS, Brazil

- Built web interfaces integrated with Flask for internal systems.
- Handled backend integration, data consumption, and form validations.
- Provided support in backend development and database operations; version control with Git.
- Conducted manual testing and validations prior to production deployments, sparking interest in QA.

Administrative Intern

Tribunal de Justiça do RS (Rio Grande do Sul Court of Justice)

Feb 2019 – Dec 2020 · 1 year 11 months | Porto Alegre, RS, Brazil

- Filed petitions for special and extraordinary appeals.
- Efficiently routed case files following court sessions.
- Provided quality public assistance and front-desk support.

EDUCATION

Associate Degree in Systems Analysis & Development

IFRS – Campus Restinga

Feb 2025 – Feb 2028 (in progress)

Civil Engineering (3 semesters completed)

UFRGS – Universidade Federal do Rio Grande do Sul

Strengthened analytical reasoning and problem-solving skills
